SKILLS

- **Languages :** Python , C , C++, Java, JavaScript
- **Frameworks/Concepts:** Pandas, Matplot, Seaborn, Scikit-learn, OOPS, HTML, CSS
- **Tools/Platforms :** Excel , Power BI, DBMS, GitHub, AutoCAD
- **Soft Skills :** Problem-Solving, Team Player, Adaptability, Leader Ship, Critical thinking

PROJECTS

Python-Based Data Analysis & Visualization Project Using EDA Techniques | [Github](#) May 2025 - Jun 2025

- Developed a Python-based data analysis project performing exploratory data analysis (EDA) on datasets using Pandas and NumPy.
- Created visualizations including bar graphs, line charts, boxplots, heatmaps, and pairplots using Matplotlib and Seaborn to identify trends and outliers.
- Implemented data cleaning techniques, handled missing values, and performed correlation analysis for meaningful insights.
- Implemented advanced features including style transfer, procedural art generation, brush suggestions, and layer-based editing.

Bank Loan Report – Data Analytics Project | [Github](#) Feb 2025 - Mar 2025

- Developed interactive Excel dashboards to visualize key business metrics and trends clearly. Improved decision-making by presenting data in an easy-to-understand format.
- Automated data cleaning, analysis, and reporting using advanced Excel functions and formulas. Reduce manual effort and increased accuracy in reporting processes.
- Generated charts, pivot tables, and summary reports to support data-driven insights. Helped stakeholders identify patterns and make informed business decisions
- Analyzed large datasets to extract meaningful insights and performance indicators. Contributed to improved operational efficiency and strategic planning.

Power BI Dashboard Project | Dataset: Cardiovascular Disease Data | [Github](#) Nov 2025 - Dec 2025

- Analyzed and transformed raw datasets using Power BI, ensuring data accuracy and consistency through proper cleaning and modeling.
- Designed interactive dashboards and visualizations (bar charts, KPIs, trend analysis) to clearly present insights and patterns.
- Derived meaningful insights to support data-driven decision making, focusing on trends, comparisons, performance indicators.
- Improved reporting efficiency by organizing data relationships and using DAX calculations for better analysis and interpretation.

TRAINING

CPP with OOPs Programming Language | LPU Skill Development | [Certificate](#) Jun 2025 –Jul 2025

- Solved 100+ structured and real-time programming problems using C++, improving logic-building problem-solving efficiency.
- Gained hands-on experience with Object-Oriented Programming (OOP) concepts including classes, inheritance, polymorphism, encapsulation, and abstraction.
- Developed mini-projects such as a Library Management System, applying file handling, STL (vectors), dynamic memory, and menu-driven programming for real-world application.

CERTIFICATION / CERTIFICATES

- Intro to Hardware and OS | Certificate Link : [Certificate](#) Sep 2023
- Bit & Bytes of Computer Network | Certificate Link : [Certificate](#) Sep 2024
- Infosys Springboard : Build Generative AI Apps with No-Code | Certificate Link : [Certificate](#) Aug 2025

EXTRA-CURRICULAR-ACTIVITY

- Participated in a 24-hour web development hackathon focused on building responsive and functional web solutions | Code Off Duty

EDUCATION

- **Lovely Professional University** Punjab, India
Bachelor of Technology-Computer Science and Engineering; **CGPA: 5 . 6** Since April 2023
- **Narayana Junior College** Telangana, India
Intermediate; **Percentage: 94** April 2021 - March 2023
- **Narayana High School** Telangana, India
Matriculation; **Percentage: 100** April 2020 - March 2021
